## WORK EXPERIENCE

**Apple** 05/2013 - Present

**Software Engineer Intern - Data Analytics, Cupertino, CA** 01/2020 - 06/2020

- Full-Stack Web Developer, primarily focused on Javascript, React.js, Redux, HTML, CSS and Ruby on Rails
- Introduced features to application workflow resulting in time savings of up to two hours for engineers when creating requests for diagnostics data
- Implemented an API and workflow to reduce amount of project code name leaked in development process
- Wrote, maintained and improved integration test coverage for multiple applications
- Designed and implemented full Dark Mode support into an application
- Participated in code reviews and weekly AGILE planning for tasks and sprints
- Shipped over 100 features, bug fixes and updates to production applications
- Was able to work side by side, receiving feedback and mentoring from a team of Senior Software Engineers, which resulted rapid learning and significant professional experience

**Store Manager, Manchester, NH** 02/2017 - Present

- Provides direct, timely feedback and coaching to store team, resulting in winning awards for both employee and customer satisfaction
- Finds new exciting ways to engage employees and ensure all day to day business goals are achieved, resulting in consistent growth in all areas of the store
- Led stores community service program for over two years, organizing multiple team outings and resulting in over \$15,000 donated to local charities
- Acts as a servant leader, focusing on employee and customer experience to achieve all goals

**Lead Genius, Nashua, NH** 12/2014 - 02/2017

**Expert, Nashua, NH** 05/2013 - 12/2014
